EXPERIENCE

Nest Nepal

Kathmandu, Nepal

DEVSECOPS ENGINEER (PREV. INTERN)

Feb. 2022 - Jul. 2024

- Moved server configuration to Nix so machines stayed consistent and deploys stopped being “snowflake” fixes.
- Built a Rust API handler for Bsp that cut load time by 5% and reduced server overhead.
- Designed GitHub pipelines that reduced downtime by ~30% by catching failures earlier and standardizing deploy steps.
- Owned production ops on AWS EC2 and Nginx—routine hardening, maintenance, and incident cleanup.

PROJECTS

tes.chat

Next.js, TypeScript, SQLite, OpenAI

CREATOR

2026 - Present

- AI-powered transfer evaluation assistant that helps community college students check which courses transfer, using real university equivalency data, not hallucinated answers.
- Aggregated 9,900+ course equivalencies from public university transfer records across 9 Maryland institutions, stored in SQLite and queried via natural language chat.
- Features transcript upload with AI parsing, multi-school comparison tables, and personalized student profiles.

eipi.bo

Rust, SSH, TUI

CREATOR

2025 - Present

- Anonymous confession platform over SSH built with russh and ratatui, real-time multi-user TUI with voting, replies, search, and SQLite persistence. No accounts, no browser, just `ssh eipi.bo`.

haylxon / hysp

Rust

OPEN SOURCE

429 / 413 stars

- haylxon: blazing-fast CLI tool to grab screenshots of domain lists from the terminal. Used in bug-bounty workflows.
- hysp: minimal package manager for statically linked binaries, designed for security-focused Linux setups.

Metis Linux

Nix, C, Rust

CREATOR & LEAD MAINTAINER

2023 - 2024

- Built a minimal x86_64 Linux distribution that grew to 4,000+ users, featuring custom window managers, a package ecosystem, and reproducible builds.

OPEN SOURCE CONTRIBUTIONS

- **NixOS/nixpkgs** — Packaged and maintained multiple packages for the Nix packages collection (25.5k stars).
- **AUR (Arch User Repository)** — Packaged and published multiple packages for the Arch Linux community.
- **spider-rs/spider** — Fixed CLI help menu rendering for the Rust web crawler (2.6k stars).
- **mfontanini/presenterm** — Fixed a crash in the main event loop triggered by large markdown files (8.6k stars).

ACHIEVEMENTS & RECOGNITION

- **ElevenLabs Best** — MorganHacks 2026.
- **1st Place** — OWASP CTF 2023.
- Discovered and responsibly disclosed vulnerabilities in the **Dutch Government** and **Cambridge University** (private disclosure).
- **eJPT** — eLearnSecurity Junior Penetration Tester certification (INE).

EDUCATION

Community College of Baltimore County

ASSOCIATE OF CYBERSECURITY (TRANSFER FROM ATLANTIS UNIVERSITY, GPA: 4.0)

Aug. 2024 - Present

SKILLS

Languages Rust, C, Python, Lua, Bash, JavaScript

Linux & Infra Nix / NixOS, Packaging, Reproducible Builds, Kubernetes, AWS EC2, Nginx

CI/CD & Security GitHub Actions, GitLab CI, Jenkins, Security Automation, Hardening
